Clinical Encounter Note

Status: FINAL | URI - sore throat, fever

Patient

Priya Nair | MRN-20240003 | DOB 1989-07-07 | Sex F
Allergies: Penicillin - anaphylaxis (documented 2019)
Conditions: Upper respiratory infection
Physician: Dr. Sarah Chen | Date: 2026-09-14T11:30:00Z

Subjective

Patient presents with 3-day history of severe sore throat, fever, fatigue, and bilateral cervical lymphadenopathy. Reports mild headache and nasal congestion. No significant cough.

Objective

Temperature: 38.6 deg C. Throat: markedly erythematous with tonsillar exudate bilaterally. Lymph nodes: bilateral cervical lymphadenopathy palpable. Rapid strep antigen test: POSITIVE.

Assessment

Streptococcal pharyngitis (Group A Streptococcus). Acute bacterial tonsillitis.

Plan

1. Prescribe Amoxicillin 500 mg TID x 10 days.
2. Rest and adequate hydration.
3. Ibuprofen 400 mg PRN or Paracetamol 500 mg PRN for fever and pain.
4. Return if symptoms worsen or fail to improve within 48-72 hours.

Grounding Report | 83/100 | risk moderate

Supported 5 | Unsupported 0 | Conflicts 1 | SOAP v1
[SUPPORTED] (subjective) Patient presents with 3-day history of severe sore throat, fever, fatigue, and bilateral cervical lymphadenopathy.
[SUPPORTED] (objective) Temperature: 38.6 deg C. Throat: markedly erythematous with tonsillar exudate bilaterally.
[SUPPORTED] (objective) Bilateral cervical lymphadenopathy palpable.
[SUPPORTED] (objective) Rapid strep antigen test: POSITIVE.
[CONFLICT] (plan) Prescribe Amoxicillin 500 mg TID x 10 days. - Documented penicillin allergy on the patient record. The note mentions: amoxicillin. This is flagged for physician review only - no therapeutic substitution is recommended by this system.
[SUPPORTED] (plan) Rest, adequate hydration, Ibuprofen PRN or Paracetamol PRN for fever and pain.

Encounter Transcript

[00:00:08] Dr. Chen: Hi Priya. What brings you in today?
[00:00:14] Priya Nair: I've had a really bad sore throat and a fever for the past three days. I feel exhausted and my neck glands are swollen.
[00:00:35] Dr. Chen: Any cough or runny nose? Headache?
[00:00:42] Priya Nair: A little bit of a headache, but no cough. Some nasal congestion yesterday.
[00:01:00] Dr. Chen: Let me have a look at your throat. Your temperature is 38.6 degrees Celsius. Your throat looks quite inflamed - I can see tonsillar exudate. Lymph nodes are palpably enlarged bilaterally.
[00:01:40] Dr. Chen: I'm going to do a rapid strep test right now.
[00:03:15] Dr. Chen: The strep test is positive. This looks like streptococcal pharyngitis - strep throat.
[00:03:35] Dr. Chen: I'll prescribe amoxicillin 500 milligrams three times a day for 10 days.
[00:03:52] Priya Nair: Is that okay? I feel like I had a reaction to a similar antibiotic once.
[00:04:05] Dr. Chen: That's important to note. Can you remember which antibiotic it was?
[00:04:15] Priya Nair: I think it started with a P... penicillin maybe? I had trouble breathing. It was documented somewhere.
[00:04:30] Dr. Chen: Rest, fluids, ibuprofen or paracetamol for fever. Return if symptoms worsen.
